

CHAPTER V

CONCLUSION AND SUGGESTION

This chapter consists of two sections, the first section deals with the conclusion of findings of the research and the second deals with suggestion.

5.1 Conclusion

Based on the results of the research in the previous chapter, it can be concluded how the 3-years-old child acquires English vocabulary. On the research analysis, it is shown that there are language skills of 3-year-old children and English language acquisition that can be seen from their understanding of movies and videos that are watched repeatedly. Second language acquisition can also be seen from the subject's ability to mention vocabulary that is often seen and heard when watching YouTube videos, such as mentioning the names of fruits and animals, and being able to say simple sentences in English. The results of this study show that 3-year-old children can acquire a lot of English vocabulary and have the ability to spontaneously pronounce the English vocabulary they have acquired. The ability is acquired through repetition or habit. She watches English YouTube videos repeatedly and continuously so as to create understanding, habit and application. The results of the vocabulary spoken by the subject in Using YouTube in children's vocabulary acquisition

This study used nouns, verbs, adjectives, phrases and simple sentences. The subject's English language ability can be seen from his understanding of the shows he watched, she was able to mention the names of the objects he watched and make phrases and sentences in English. Through music videos, the subject also gained the ability to sing using the second language. The ability of a 3-year-old child, this is due to his habit of watching YouTube videos in English and Indonesian so that his focus is divided, not only focusing on watching YouTube videos repeatedly and continuously, causing a lack of understanding, habits and lack of application. Video-based social media that is widely used today, namely YouTube, greatly affects the acquisition of English studied in this research. YouTube has an important role in children's language acquisition. Children's language acquisition and learning can be learned through YouTube media, where the visuals and audio on YouTube are interesting and make it easier for children to acquire and remember language well. In this study, YouTube plays an important role in children's knowledge of colors, nouns, and basic number language.

5.2 Suggestion

This research is only limited to the discussion The ability of a 3-year-old child, this is due to his habit of watching YouTube videos in English and Indonesian so that his focus is divided, not only focusing on watching YouTube videos repeatedly and continuously, causing a lack of understanding, habits and lack of application. Video-based social media that is widely used today, namely YouTube, greatly affects the acquisition of English studied in this research. YouTube has an important role in children's language acquisition. Children's language acquisition and learning can be learned through YouTube media, where the visuals and audio on YouTube are interesting and make it easier for children to acquire and remember language well. In this study, YouTube plays an important role in children's knowledge of colors, nouns, and basic number language.
