Hello!

Your article has been sent for review. The article is still at work. As soon as there is a response from reviewers, we will contact you.

Reviewing is an integral part of the scientific publication, which confirms the high quality of scientific articles. Reviewers are experts who invest their time to improve your article! In the process of reviewing the manuscript should become:

- More reliable. Reviewers may point out gaps in your work that require more detailed explanation or additional experimentation.
- Easier to understand. If you have a difficult time with your work, the reviewers may ask you to correct it.
- More useful. Reviewers review your research for importance within their subject area. Another aspect of having a review policy with journals is that the editorial team wants to make sure that they publish only high-quality materials in their own publication. If a journal does not publish good quality work, it will reputation and the number of readers will decrease.

Wed, 11 Oct, 05:43

Hello dear authors, I hope you are doing well. Your article has been accepted for publication in the October issue of the journal (No. 5(125)2023, publication date 30.10.2023) and we want your article to be seen by more people and readers in order to increase interest in your article worldwide. So we will be adding your "graphical abstract" figure next to the article, an example you can already see on the journal page at <http://journals.uran.ua/eejetissue/view/15935>. Remember that this is important and affects the citation of your article, so please send the "graphical abstract" no later than October 12, 2023.

=====

For your information:
A graphical abstract is an image that appears alongside the text abstract in the contents. This is a single, concise, pictorial, and visual summary of the main findings of the article.
A graphical abstract should allow readers to quickly gain an understanding of the take-home message of the paper and is intended to encourage browsing, promote interdisciplinary scholarship, and help readers identify more quickly which papers are most relevant to their research interests.

Authors must provide an image that clearly represents the work described in the paper. It could either be the superposition of several figures from the article or a figure that is specially designed for the purpose. Any postage stamps, currency from any country, or trademarked items should not be included in it. Graphical abstracts should be submitted as a separate file.

Requirements for graphical abstract:

- image size: the minimum required size for the graphical abstract is 560 × 1100 pixels (height × width) with a minimum resolution of 300 dpi. If you are submitting a larger image, please use the same ratio. Please note that your image will be scaled proportionally to fit in the available window.
- Font: please use the font with a large enough font size as the image will be reduced in size for the table of contents to fit a window.
- File type: .jpg, .jpeg, .png
- File size: no more than 5 Mb.

No additional text, outline or synopsis should be included. Any text or label must be part of the image file. Please do not use unnecessary white space or the heading "graphical abstract" within the image file.
